

Flock & Flex Remover

Product information

Non flammable organic solvent to remove residues of Transferflock and -flex and PVC- plastic films

We strongly recommend not inhaling the product and not to bring in contact with skin. The solvent is a strong degreaser.

Technical Data

Boiling point:	40°C
Flame point:	not applicable
Ignition point:	605.0°C

Application

Bring the solvent with the back side of the fabric in contact until it is soaked completely. After a few seconds, remove the printing you want to delete. Remaining adhesive residues may remove during the washing procedure.
